FORGE™ EMBER

MEDIUM-HEAVY OIL

The Forge™ Ember is the newest performance hybrid from Motiv Bowling. Built to generate more friction than previous hybrids, the Forge™ Ember combines technology from two very different coverstock systems to deliver a new brand of motion. Bowlers will find increased strength in the oil without sacrificing down lane motion. More down lane motion means that the Forge™ Ember will be useful for a longer window during competition.

DETONATOR™ WEIGHT BLOCK

The Detonator™ is a stable and strong combination of low rg with high differential. The fast spinning low rg provides control, while the high differential gives traction and strength.

15# RG: 2.47 | 15# Diff: .055 | Flare: 5"+

INFUSION™ MXC HYBRID REACTIVE

The Forge™ Ember combines technology from two very different coverstock systems to deliver a new brand of motion. Traditionally, the most angular motions from MOTIV® featured the Infusion™ coverstock system. Conversely, the coverstocks with the MXC distinction were those with the most mid-lane traction and control. Combined, bowlers should see significant traction in the oil with more down lane motion than is expected from such a strong cover.

2000 GRIT LSS FINISH

A 2000 grit LSS finish provides added traction and strength for increased control, even on higher volumes of oil.
